PROFESSIONAL SUMMARY

Senior Full-Stack & Systems Engineer with 6+ years of experience architecting distributed backends, autonomous agents, and cloud automation platforms. Proven track record in high-throughput Python/FastAPI services, Playwright browser automation, and privacy-preserving identity systems.

WORK EXPERIENCE

Lead Software Engineer — Apex Distributed Labs *(2023 - Present)*
• Architected cloud automation pipelines handling 50,000+ daily headless browser tasks via Playwright and CDP.
• Implemented zero-trust identity vault and OIDC backchannel authorization for agentic workflows.
• Cut task execution latency by 42% through connection pooling and intelligent DOM extraction.

Full-Stack Software Engineer — Vanguard Cloud Technologies *(2020 - 2023)*
• Engineered asynchronous FastAPI microservices serving over 2M requests daily with sub-50ms p95 latency.
• Built dynamic form ingestion workflows for cross-origin iframes and complex interactive web interfaces.

TECHNICAL SKILLS

Languages: Python, TypeScript, SQL, Go
Frameworks & Tools: FastAPI, Playwright, Browserbase, Pydantic, Docker, Redis, ReportLab
Cloud & Security: AWS, Render, Auth0, OIDC CIBA, AES-256-GCM, Residential Proxies

EDUCATION

B.Tech in Computer Science & Engineering — National Institute of Technology (NIT), 2020
